

## PCT Power Generator Components

### Field components

Axial lead tubes  
 Bore tubes  
 Coil blocking  
 Collector assemblies  
 Collector ring insulation  
 Collector rings  
 Copper windings  
 Creepage blocks  
 Damper channels  
 Field wedges

Insulated collector bars  
 Main leads  
 Retaining rings  
 Ring insulation  
 Rotor wedges  
 Slot armor  
 Sub-slot covers  
 Temporary wood  
 Terminal assemblies  
 Turn insulation

### Stator components

Axial lead tubes  
 Bore tubes  
 Coil blocking  
 Collector assemblies  
 Collector ring insulation

Collector rings  
 Copper windings  
 Creepage blocks  
 Damper channels  
 Field wedges

Accessories including brush rigging assembly, collector housing and gas shields

Repair kits for custom field service, field rewind and stator overhaul events

Distribution — for hard-to-locate parts and components

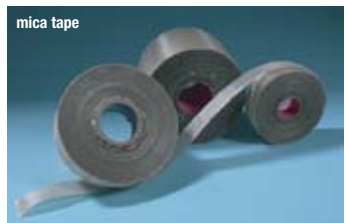

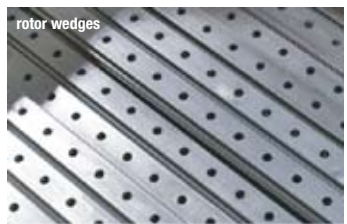

Reengineering Services — reverse engineer specifications for components you provide

### Backed by

**PCT Knowledge** — industry-wide recognized engineering capabilities  
 Power Generator OEM manufacturers worldwide spec **PCT Power Generation Products**

**PCT Experience** — with over 200 years combined know-how  
 Extensive background with power generator components

**PCT Proven Performance** — world-class manufacturing  
 We produce what we design, with state-of-the-art, efficient manufacturing processes

Call our Sales Engineering staff with your most demanding applications.

They love a challenge.
