

Generator Rewind Kits

PCT provides most of the commonly replaced components required in rewinding generator rotors and stators and maintains a full compliment of raw materials used for commonly replaced components.

Typical Rotor-Replacement Parts

copper-bore components: terminals, nuts, seals
collector assemblies
slot cells
turn insulation
permanent blocking
retaining-ring insulation

Typical Stator-Replacemnt Parts

support rings
support cones
mica tape
blocking
filler
ripple spring
conforming materials

- Reverse engineering, on-site or at PCT
- Rapid delivery
- Experienced generator-design engineers with 'State-of-the-Art' materials

Backed by

PCT Knowledge — industry-wide recognized engineering capabilities Power Generator OEM manufacturers worldwide spec **PCT Power Generation Products**

PCT Experience — with over 200 years combined know-how Extensive background with power generator components

PCT Proven Performance — world-class manufacturing We produce what we design, with state-of-the-art, efficient manufacturing processes

Call our Sales Engineering staff with your most demanding applications.

They love a challenge.
